Volunteer Lunch Counts – ACE Systems

Aerospace Center for Excellence IT

Introduction

This document is intended to give a brief overview to how chairman can enter lunch counts within ACE Systems.

Accessing ACE Systems

ACE Systems can be accessed using the link below. It is recommended to bookmark this website on your phone, computer or other devices.

<https://systems.aceedu.org>

Chairman accounts were created for the first time in March 2026. Try using your email address and the password in the format **Lastname5555** where **Lastname** is your last name (first letter capitalized) and **5555** the last four digits of your phone number.

Use the “**Forgot Password?**” tool to reset your password. It will send a link to your email that you can use to enter a new password.

If you have trouble signing in, please email support@flsynf.org.

Tip: If the error you receive is “**You are not yet registered in ACE Systems.**”

You are either using the wrong email address, or we have not set your account up yet.

Recording Meal Counts

After signing in, meal counts can be entered by going to **Chairman Tools > Lunch Counts** from the main menu. This page will show you a list of your areas along with current totals. You can record counts and make changes all the way up until 10AM the day prior. You can enter your estimates early and update them as the event progresses. To enter or adjust your meal counts, click on the blue area name you’d like to work with.

See additional screenshots on the next page for more information.

Tip: If you are on a mobile device, you’ll need to tap the three-line hamburger icon ☰ at the top left to see the main menu.
